Hi Kate,

This deliverable from Jim/HW adequately addresses the recent TDM for Alon. I am drafting a letter for David's signature to issue to Alon which requests a completely revised UIC application and aquifer exemption request. Assuming we issue such a letter, a detailed technical review of the January 2011 application will be unnecessary, and should not be undertaken at this time. Please do not close out the task, we will likely need support for a conference call once the letter is released but a more detailed technical review of the application should not be undertaken at this time.

Subject: Comments on the Alon responses to the RFI of 3-27-14

Hi Michele,

The draft comments are attached for your review. They are written from an EPA perspective and are intended for use in drafting an EPA response to Alon. Included are fairly extensive comments on the aquifer exemption issue, which may or may not be entirely relevant to EPA, but they may be a basis for discussion.

If you have any questions or would like to discuss the comments, please let me know.

Thank you,
Jim
